

AKASH RAWAT | Full Stack Developer (MERN)

+91 7489487205 | rawatakash1612@gmail.com | github.com/Akashrawat4561 | linkedin.com/in/akash-rawat-btech

SUMMARY

MERN stack developer and final-year B.Tech Computer Science student who enjoys building things people actually use, from a URL shortener with live link analytics to an AI security platform that streams alerts in real time. Completed a 3-month MERN internship at Sysslan IT Solutions and is comfortable working across React, Node.js, Express and MongoDB. Looking for a fresher full stack role where I can keep learning and ship real features.

SKILLS

- **Frontend:** HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Vite
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, FastAPI
- **Database:** MongoDB, SQL
- **Tools:** Git, GitHub, Postman, Vercel
- **AI / Computer Vision:** TensorFlow, OpenCV
- **Languages:** Java, Python, C++

EXPERIENCE

MERN Stack Developer Intern – Sysslan IT Solutions 10 Apr 2026 – 10 Jul 2026 (3 months)

- Built responsive, reusable React.js components and pages from design requirements.
- Developed REST APIs with Node.js and Express.js and connected them to MongoDB for data storage.
- Used Git and GitHub for daily version control, and tested APIs with Postman to catch and fix bugs early.

Cybersecurity Analyst (Virtual Internship) – Tata Forage Oct 2024

- Worked through simulated real-world security scenarios covering threat analysis and risk assessment.
- Studied attack patterns and recommended mitigation steps in line with industry practice.

PROJECTS

ShortX – URL Shortener [Live Demo](#) | [GitHub](#)

React.js, Node.js, Express.js, MongoDB, JavaScript, Vite

- Built a full-stack URL shortener with custom short codes, live alias-availability checks, link expiry and fast redirects.
- Added JWT authentication with separate guest and signed-in workspaces, plus traffic analytics so users can see how their links perform.
- Designed the REST APIs in Node/Express with MongoDB storage, and added an in-memory fallback so core features keep working if the database is down.
- Deployed on Vercel with a live production demo.

SecureVision AI – AI Cybersecurity Platform [GitHub](#)

React.js, FastAPI, Python, TensorFlow, OpenCV, SQLAlchemy

- Built a platform that brings threat monitoring, security analysis and AI-based detection together in one place.
- Implemented deepfake image and video analysis using computer vision and machine learning.
- Added network anomaly detection to flag suspicious activity, along with an SSH honeypot and a threat visualization module.
- Streamed security logs live over WebSockets, and secured the app with authentication and API rate limiting.

Opportunities OS – Opportunity Discovery Tool [GitHub](#)

JavaScript, Node.js, webcmd

- Built a browser-automation system that finds and collects job and interview opportunities from multiple platforms.
- Used a modular, adapter-based design so each new platform can be added independently, with webcmd handling navigation and data extraction.
- Accepts plain-language style queries and turns them into platform-specific workflows.

EDUCATION

B.Tech, Computer Science – Shivajirao Kadam Institute of Technology & Management 2023 – 2027 | CGPA: 7.2/10

CERTIFICATIONS

React – Coursera | Cybersecurity Analyst – Tata Forage | MongoDB Overview – GeeksforGeeks

ACHIEVEMENTS

3★ C++ (HackerRank) | Winner - SLAB Hackathon | 1st Place – Chess & Volleyball
