

AKASH RAWAT | Full Stack Developer

+91 7489487205 | rawatakash1612@gmail.com | github.com/Akashrawat4561 | linkedin.com/in/akash-rawat-btech/

SUMMARY

Full Stack Developer specializing in building scalable web applications and real-time systems with AI integration. Experienced in developing production-like platforms including cybersecurity tools and AI-based monitoring systems using Node.js, React, and MongoDB.

SKILLS

- **Frontend:** HTML5 | CSS3 | JavaScript | React.js | Tailwind CSS
- **Backend:** Node.js | Express.js | MongoDB
- **Tools:** Git | GitHub | REST APIs | Postman
- **Languages:** Java | Python | C++

PROJECTS

1. SecureVision AI – Edge-Based AI Cyber Threat & Deepfake Detection System

Tech: Node.js, Express, MongoDB, Python, OpenCV, React, AI APIs

- Developed an edge-based AI system to detect cyber threats and deepfake media in real time
- Implemented multi-modal analysis (image/video) for identifying manipulated content
- Integrated external APIs for threat intelligence and anomaly detection
- Built a real-time dashboard to visualize alerts, detection results, and confidence scores
- Processed and analyzed 100+ media samples to validate detection accuracy and system performance
- Designed a system for low-latency edge processing to reduce server dependency

2. Edge-Based Real-Time AI Proctoring System

Tech: React, Node.js, Express, MongoDB, WebRTC, TensorFlow.js

- Built a real-time proctoring system using WebRTC for live video monitoring
- Implemented AI-based face tracking and behavior analysis using TensorFlow.js
- Detected suspicious activities such as tab switching and focus loss
- Integrated JWT authentication for secure session management

3. Student Accommodation Finder & Management System

Tech: React, Node.js, Express, MongoDB

- Developed a full-stack platform for searching verified student accommodations
- Implemented dynamic filtering (budget, location, amenities) with responsive UI
- Built secure authentication and role-based access for users and property owners
- Designed REST APIs for property listing and management workflows
- Improved search efficiency by implementing optimized filtering and query handling

EXPERIENCE

1. Cybersecurity Analyst (Virtual Internship) – Tata Forage | Oct 2024

- Simulated real-world cybersecurity workflows including threat analysis and risk assessment
- Analyzed attack patterns and proposed mitigation strategies based on industry practices

EDUCATION

B.Tech Computer Science, Shivajirao Kadam Institute of Technology & Management, (2023-2027)
CGPA: 7.2/10

CERTIFICATION

React – Coursera | Cybersecurity Analyst – Tata Forage | MongoDB Overview – GeeksforGeeks

ACHIEVEMENTS

3★ C++ (HackerRank) | Hackathon Participant (Prayatna 3.0) | 1st Place – Chess & Volleyball
